Findspot index

NOTE: This is not a master index to all locations mentioned; it is merely an index of the miscellaneous findspot references scattered throughout LTT, included in order to help those of you who want to examine what has been reported from any particular geographic area. The majority of references relate to contributions which people have kindly sent in, although there are some to pieces in other articles where the findspot of a mentioned piece is known and stated.

The findspot index is supplementary to the main index. It is intended solely as an index of findspots, not issuer locations, and does not usually double up on references where the location of issue is stated on the piece, or implied by the title of an article. For these, please use the main index.
